Today's general toy department is a typical assortment store with a focus on goods. There are a lot of products on the shelves due to lack of unexpectedness, but basically, the character toys are mainly placed, the same items are lined up at all the shops, and there are no proposals for experience workshops etc. Is the current situation. ASOBISKI is a new age toy shop that combines toys selected from a unique perspective as a new age toy select shop and an educational experience workshop that can only be experienced here every weekend.
